Polyester Fine Putty 2kg

Polyester Fibre Putty 1.8kg

Plastfill Polyester Putty for Plastic

Light Polyester Putty 3.8kg

GAP 20 is a white fine finishing putty to fill pin holes, small irregularities, small paint damage and scratches. Easy to apply and sand. Product also adheres to iron, steel, aluminium, galvanized substrates and glass fibre reinforced materials.

GAP 40 is a light grey polyester glass-fibre putty for bridging of cracks and small holes and is waterproof. Adheres to iron, steel, aluminium and glass fibre reinforced materials. Impregnated fibres making application easy and equal to spread.

GAP 70 is a very flexible light putty specially designed for plastic surfaces that give you a smooth finish with fast and easy sanding. During sanding the putty fades from dark grey to light grey, replicating the colour of most bumper colours.

GAP 93 is an easy to sand beige light polyester putty that has a lower viscosity compared to GAP 33. Very smooth pinhole-free finish due to self-levelling ability.

Plastic Repair Kit - everything you need in one kit

Finixa offers a wide range of adhesives and sealants specially developed for the professional body shop; versatility, problem-solving, time-saving, ease of use and environmental friendliness are the parameters in the development of our products. Check out Finixa's plastic repair technology. The ultra-fast and cost-effective curing times combined with ease of use and extreme adhesion make this the absolute first choice of every professional. Your Body Shop is reliant on labour sales, using Finixa Plastic Repair enables you to repair more plastic parts, hence more labour, more profit.
